If you have already received an attached installer, please go to step 2.

1.Go to forticlient.com/downloads. Scroll down, and click "download for MacOS". Once the download is complete, open it up.

FortiClient VPN
Remote Access
IPSec VPN - Windows, MacOS and Android only
SSL VPN
S Technical Support
E Download for Windows C Download for MacOS
ios Download for iOS 👘 Download for Android

2. Open the installer. Double click on the "FortiClient update". You will get prompted saying it's an app downloaded from the internet, click open if you receive this prompt.

	"FortiClientUpdate" is an app downloaded from the Internet. Are you sure you want to open it?			
	This item is on the disk image "FortiClientVPNOnlineInstaller_6.4.dmg". Safari downloaded this disk image today at 11:03 AM from filestore.fortinet.com			
	Don't warn me when opening applications on this disk image			
?	Cancel Show Disk Image Open			

3. It will begin to download the application. Once this is complete you will see the option to install. Please click this

4. When the FortiClient installer opens, click continue on the first 2 screens, and click agree on the license agreement. At the next window, please click install.

0	Install FortiClient			
	Standard Install on "Macintosh HD"			
Introduction	This will take 80.5 MB of space on your computer.			
License	Click Install to perform a standard installation of this software			
Destination Select	for all users of this computer. All users of this computer will			
Installation Type	be able to use this software.			
Installation				
Summary				
	Go Back Install			

5. You will then be prompted with, "installer is trying to install new software". Please input your computer password here. If you do not have a computer password, just click "Install software".

Installer is trying to install new software.					
Enter your password to allow this.					
User Name: Tech Services					
Password:					
Cancel Install Software					

(

6. Open up the FortiClient vpn application. Check the box, and click "I accept". After this, in the center of your screen you will see "configure vpn". Please click this.

7. Configure the vpn with the following settings below. For the username box please only include your WC id, **do not include the @washcoll.edu** part of your username. After all the vpn settings match the screenshot, click save.

	FortiClient The Security Fabric Agent						
FortiClient VPN			*	٠	•	•	•
Upgrade to the full version to access additional features a	nd receive technical support.						
New VPN Conr							
VEN	SSEVEN IPSECVEN AML						
Connection Name	Washington College						
Description							
Remote Gateway	tube.washcoll.edu	×					
	Customize port 443						
Client Certificate	None \$						
Authentication	Prompt on login O Save login						
Username	your wc user id						
	Do not Warn Invalid Server Certificate						
	Cancel Save						

8. The next screen you will be taken to, will have a username field, which will be filled with you WC id, and a password field. Please type your washcoll password in this field, and click "connect".

9. Sometimes it can take 30 secs. to a min for the vpn to connect. Once you see you are connected, you are good to go.
